## Features

- Suitable for the cooling of outdoor cabinet.
- It cools down the air inside the cabinet, dissipates the heat out of the cabinet and protects those heat-sensitive components.
- Particularly suitable for the cooling of outdoor cabinet in sitting ambience within the range from 40 °C to 55 °C, in comparison to other lower-performance heat dissipating devices;
- easy installation with the option of fully external mounting or one of three semi-embedded options
